

Press release

New Vinyl/CD.

Johan Sara jr Remix- Special edition

Johan Sara jr. was born and raised in Alta, and lives now in Maze. He is now releasing his tenth album. The starting point for this release is from when Johan 35 years ago gave his first concert at a youth club in Alta. Already then he had decided to become a musician. A big dream at the time was to release a vinyl LP record in the future. Now this has become a reality with this album and it is a remix release. 35 years have passed since the first concert and this is now celebrated with a very special project concept in which he has invited friends and colleagues to interpret his music in a remix landscape format. The composer colleagues have chosen freely from the various previous releases and remixed tracks in their own taste. This has become an album with many variations as if it were a separate playlist on a modern format. Very varied and the touch of different styles have made this album a tasteful experience in a landscape of modern Sámi music context. A refreshing experience where the intention has not been to complicate the music, but to bring it more in the direction of the musical styles that exist in the pop world today. Johan is also especially very proud to present the resources involved that exist in his own region and / or originating from there. A big THANK YOU to everyone who has contributed to this album becoming a reality.
